## Projects

### Galaxy Bomber

Multiplayer interactive game that allows users to challenge their friends via facebook. Implementing sockets allow players from all over the world to connect in real time to interact with their opposition.

**MongoDB Express.js Node.js Angular  
Socket.io Facebook OAuth**

### IntellegoInfo

Bringing numbers to life, this app uses the Huffington Post API Polls and illustrates the numbers in related d3.js charts. While rendering the charts headlines from the polls are used to search the NY Times API for relevant headlines showing the user applicable stories relating to the poll.

**Express.js Node.js Angular RESTful API  
d3.js**

### SMARTket Exchange

Taking raw data from the NYSE and RESTful API calls to databases this app allows users to search over 2,500 company's current and historical stock information. D3.js allows users to visualize data in a more relatable way.

**Express.js Node.js Angular RESTful API  
d3.js**

## Education

### Galvanize 2015 - 2016

#### Full Stack Developer Program

Immersive program that focuses on JavaScript fundamentals and modern web full stack skills.
